

Christ the King Learning and Growth Center

February 2019

When we stray too much from routines toddlers and smaller children get confused and may act out more or throw tantrums. Consistency as often as possible, is key. Try to be consistent across the board with your child's discipline, sleep habits, or mealtime routines to help eliminate unnecessary confusion.

What are we learning?

Upcoming Events/Announcements

Do you have a child that is or will be four years old in the coming months? Did you know that Christ the King Catholic School has a state accredited and licensed Pre-K program that is available for those ready to attend a prekindergarten program? Enrollment for CTK Pre-K Program will begin in March for the 2019-2020 academic school year. To learn more or to tour the CTK school facility and pre-kindergarten classroom please contact Erin Clark, 270-821-8271.

CTK Parish Trivia Night @ 6:30pm
\$20 play and meal/childcare is available \$5 per child
St. Patrick's Day
First Day of Spring

COOL KID FACTS: A lady bug is a type of beetle. Some have spots and some do not! Ladybugs taste and smell with their antennae. They have 2 sets of wings. The outside hard shell is for protection and the inner set is what the bug uses to fly! The color of the ladybug sends off a message to its predator that it may taste bad or be poisonous. Ladybugs are helpers to a garden because they eat aphids and mites which are bugs that are harmful to plants.

JOKE OF THE MONTH: What do snowmen like to eat for breakfast? *Frosted Flakes!!*
