Dear Mr Handa

Project management as a discipline is growing with mind-boggling speed. The reason being that project management is redefined where project implies projection of 'dreams' or 'vision' or 'strategies' and management facilitate to awaken the dream or realize the vision or deliver the strategies.

India is fortunate to be the first country outside Europe to host the historical IPMA World Congress on 'Vision to Reality – the project management way'. It is targeted to be the largest Congress ever held in last 4 decades. There are 12 Central Government Ministries supporting the Congress besides 13 International and 42 National associations are behind the Congress as well. It is for the first time that so much emphasis is placed in the World Congress in last 40 years or so. It is a unique opportunity to get to know the best practices followed globally.

International Project Management Association (IPMA) comprises of 36 member countries from all over the world. 28 are from Europe. India and China are the only two countries from Asia- Pacific region that are a part of the IPMA family.

Best of the best brains are coming to participate in the Congress. There are 136 paper presentations covering 12 Streams, 10 Congress keynote speakers and 4 Panel discussions. 2000 delegates are expected from 80 countries.

We look forward to your own participation besides getting few more nominations from your company. Let us together make the IPMA congress a memorable one. India's turn to host next IPMA Congress will come only after 25+ years.

I also need your good wishes, as I happen to be the first President of IPMA in the last 40 years who is not from Europe.

I am enclosing the Congress and Global PM Forum brochures and IPMA Newsletter.

Thanks and see you in the Congress.

Sincerely,

Ms. Neeraj Sethi
