TRAINING AND QUALIFICATIONS IN HORTICULTURE

Working In Partnership with Yourspace.compost gives us an opportunity to offer pathways into employment for our service users, volunteers and course learners. Under the supervision and guidance of our experienced team, people are mentored in the real working environment and where possible offered paid employment.

Yourspace.compost provide competitive grounds maintenance to local school grounds, residential homes, churches and community spaces. We also maintain private gardens and undertake all aspects of Landscaping and gardening work.

Please [contact us](#) if you are interested in supporting these progression pathways and would like a quote to maintain your green space or grounds.

We can tailor a programme of visits to suit all needs, be it a one off project or a year round schedule of visits.
