A vibrant illustration of the solar system. On the left, a large, glowing orange and red Sun dominates the frame. Several planets are shown in orbit around it, including Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. A comet with a bright blue and white tail streaks across the bottom left. The background is a deep black space with a subtle yellow and blue nebula-like glow at the bottom right.

A Boeing 747 Cruising at 550 MPH.

- To travel from San Francisco to New York takes about 6 Hours.
- To travel all of the way around the Earth takes less than 2 days.
- To get from Earth to the Sun would take 18 Years!
- To get from the Sun to Pluto would take 700 Years!
- To get to the nearest star would take 4,718,913 years

Pluto?

A stylized image of Saturn with its rings, overlaid with a white rectangular box containing the text "Questions?". The planet and rings are rendered in a golden-brown color against a dark background. A white circle is centered over the planet, and a white rectangle is centered over the rings. The text "Questions?" is written in a white, sans-serif font across the center of the image.

Questions?
