

An open letter to the citizens of Martin County

At a time when it seems elected officials don't understand fiscal responsibility and have lost touch with those that they represent, Martin County has an opportunity to elect a leader that truly stands out from the crowd.

Harold Markey, a retired professional, has decided to offer his time and knowledge to serve the public as a commissioner.

I have known and worked with Harold for more than 26 years. My interactions with Harold made it clear to me and others that he could be trusted. He had the ability to listen, assess, understand challenges and plan responsibly.

It was obvious in his words and actions, Harold had a very unique management ability. The team that he developed over the years is well suited and trained to address Martin County's facilities. He had always had the County's best interest in mind when it came to planning and spending.

Harold's grasp of Martin county operations, the people it serves and its needs is humbling. Martin County residents have an exceptional candidate and will be well served by such a commissioner.

Sincerely,
Enviro Team North America

Patrick O'Donnell
Managing Member
