\*Note- Team scores were determined by the following process:

I took the total team handicap and subtracted the number of pops used on the first 6 holes. I then took 67% of the remaining handicap to determine a final score.

Example: Quinn/Quinn had a combined 41 handicap. Had 16 total pops on first 6 holes to leave 25. Took 67% of 25 and rounded to the nearest whole number which is 17. Team total score  $68 - 17 = 51$ .
