

Greetings from Notre Dame!

My name is Marissa Koscielski. I am currently studying for my masters in the ESTEEM program at Notre Dame (esteem.nd.edu). The ESTEEM program is an entrepreneurship master's program, focused on science, technology, and medicine-based innovations.

For my thesis project, I am developing a medical device for amputation and monoplegic individuals. The best way to do this is by learning the raw stories from individuals. I wanted to inquire if you would be able to send this survey to your community. If you have five minutes to answer these questions, we would be really grateful for your feedback. The answers are anonymous, and if you have any questions or would like to learn more about the project, please feel free to contact us at mkosciel@nd.edu.
