
Safety Field Director

Cardinal Health and Safety Consulting, LLC has a client in immediate need of a Safety Field Director reporting to the President of the company.

Our client is a certified steel contractor in Ohio and Michigan offering quality service for Reinforcing Steel Installation, Structural Steel Erection, and Reinforcing Steel Fabrication and Supply. They are based in the Toledo, OH area with a regional office in the Cincinnati, OH office. Depending on the project load, they employ between 75 – 150 employees and gross approximately \$17.5M in revenue annually. They typically have 10 to 15 projects in the field at any one time.

The successful candidate will have a degree in Environmental, Health and Safety or a related field, 3 to 5 years of professional safety experience, preferably in construction and hold an OSHA 30 Hour Construction Card. OSHA Construction 10 and 30 Hour Authorized Trainers are highly desired. In addition, a strong business acumen is desired as it is essential that safety be integrated into the overall company structure.

Responsibilities include conducting site safety audits/inspections, training and injury/illness investigation and case management as well as standard administrative responsibilities such as recordkeeping and program development.

This position comes with a generous compensation package, including a vehicle allowance and fuel card. The benefits package includes medical, dental, voluntary vision and life, vacation and personal days and a 401k retirement plan with company match. Up to 25% overnight travel may be required at times. The company is willing to pay for relocation for the right candidate.

This is a great entry level position. Interested candidates should send their resume and salary requirements to rich@cardinalhs.net with Construction Safety in the Subject Line.

Resumes without salary requirements will not be considered.
