

PMOrchestrator, Inc. Releases Pioneering Approach to Program/Project Management with the Launch of their new PMSOC Solution

PMSOC (Project Management Service on the Cloud) solution is changing the paradigm of program/project management for small and mid-sized businesses in its all-in-one solution to deliver maximum business impacts and 'level the playing field'

RESTON, VA – March 19, 2015 - [PMOrchestrator, Inc.](#), a leading management consulting and advisory firm, is pioneering a new approach in how program/project management office (PPMO) technology and managed services are delivered, with its newly released [PMSOC](#) (Project Management Service on the Cloud) solution.

An outgrowth of PMOrchestrator's core competency, the management of transformative systems throughout the entire lifecycle from conception to deployment, the new PMSOC solution addresses a critical market need to deliver maximum project management efficiency and outcomes at cost-effective rates to small and mid-sized businesses (SMBs) by leveraging the power of expertise and technology. It is this combination of PMOrchestrator's industry-leading expertise, process, and methodology along with the program and project management tools in a value-driven managed service that makes PMSOC a true game-changer that is 'leveling the playing field' between SMBs and larger enterprises.

PMSOC is a Managed Services-based PPMO approach, delivering Project Management as a Service, providing all-in-one technology and management support as well as full and flexible PPMO functionality. This includes strategic and tactical support from certified experts needed to make effective program/project management decisions. As a cloud-based solution, PMSOC increases business agility, delivering solutions to clients more rapidly in a streamlined and cost-effective manner. Additionally, harnessing the value of the cloud, PMSOC does not require any on-premise hardware or software infrastructure or maintenance. Scalable, PMSOC's capabilities can be implemented ala carte to evolve and grow along with the organization.

"PMSOC, through its all-in-one solution, is serving to 'level the playing field' and make a full range of program and project management services as a managed service available to SMBs (small & medium-sized businesses)," stated Richard Hawes, Manager of Product Marketing for Project and Portfolio Management, HP Software. "This is an innovative package solution utilizing the cloud, tools and managed services in a centralized, streamlined approach. Backed by PMOrchestrator's industry-leading reputation for knowledge and expertise, PMSOC is truly revolutionary and positions SMBs to maximize their operational activities to glean optimal value and results."

"In developing the concept for PMSOC, we were focused on delivering a solution that addresses the challenges facing the majority of SMBs today - time and lack of resources - to realize maximum business agility and outcomes while effectively leveraging these new technologies," Babak 'Bobi' Habibi, Chief Orchestrator for PMOrchestrator explains. "Our PMSOC solution addresses the ever-intimidating unfamiliarity, lack of expertise and the cost, to successfully leverage new PPMO technologies, streamline processes and maximize best practices. And we do this in a manner that truly levels the playing field."
