

TRIBUTE®

GROWTH PELLETS

A high-fat, low-starch, low-sugar feed formulated for young growing horses, pregnant and lactating mares.

PRODUCT CODE: 916P

FEATURES AND BENEFITS

- ❖ **No Corn Formula!** to keep sugar and starch levels low.
 - ❖ Lower Non-Structural Carbohydrate (NSC=sugar + starch) content reduces insulin response. Elevated insulin levels can inhibit hormones important to normal bone development and contribute to developmental orthopedic disease.
 - ❖ Prevent “Fetal Programming”—feeding high NSC diet to pregnant mares may increase the likelihood of her foal developing insulin resistance/metabolic syndrome.
 - ❖ **Higher fat, highly digestible fiber and lower sugar and starch** for calmer horses and improved gut health.
 - ❖ **Essential** amino acids for growth and muscle maintenance.
 - ❖ **Essential** organic minerals support normal bone and tissue growth.
 - ❖ **Essential** fatty acids, **Omega 3 and 6**, for healthy skin and haircoat and support of normal tissue function.
 - ❖ Optimum levels of antioxidants Vitamin E, Vitamin C and Selenium reduce damage from aging and exercise. Also boosts immunity.
-  EQUUSFORM
- ❖ With microencapsulated active dry yeast; acts as both a pre-and probiotic, increases total diet digestibility and improves overall gut health.

*A Phytase Unit (FTU) is defined as the quantity of enzyme which liberates one micromole of inorganic phosphate per minute from sodium phytate at 37°C, 5.5 pH

This feed contains a dry source of cellulase that breaks down cellulose, a dry source of protease that hydrolyzes proteins and increases the digestibility of protein in soybean meal based diets, a dry source of lipase that hydrolyzes triglycerides, a dry source of hemicellulase that breaks down hemicellulose, and a dry source of phytase which hydrolyzes phytate and increases the digestibility of phytin-bound phosphorous.
