- Mosby is a Trust 100W son out of NJW 03T 44U Maryellen 210X, one of Locust Hill Farms cornerstone Hereford donors. His impeccable EPD profile is only enhanced by his phenotype. His dam very quickly made her way to the top of the herd. Mosby followed in his mother's footsteps and was one of our top bull calves. With an impressive birth to yearling spread and a WW, YW, M&G, REA and CHB\$ all in the top 10% or better, this is a bull that can fill many voids.

*Are you looking for a bull and assessing your needs,
looking at all options?*

**RISK MANAGEMENT SAYS, THE MORE YOU KNOW ABOUT YOUR
PURCHASE, THE LESS THE RISK.**

*Remember, the bull you're looking for is 50% of the genetic value of your next calf crop
and if you keep replacements, he has a much longer impact.*

The look of your bull means a lot. The performance of your bull means a lot more! Performance testing is not to see how fat they can get. We target a 3.5 lb. ADG. Performance testing is to collect and evaluate data on how the bull performs. We use the standards set by VDACS "Virginia's Finest" program to evaluate our bulls.

Consider a Hereford bull in your needs assessment. National demand for Hereford bulls is great; 40 extra lb. at weaning (heterosis), feed efficiency and great replacement momma cows with fertility and longevity — the marketplace's favorite hybrid calf. You will also find he has a great personality. We think that is a pretty big deal too!
