**Please contact the board for any other questions you may have. We look forward to serving you, our membership and this wonderful breed.**

President's Message:

Well Summer is here, and I hope those that can, are enjoying the warm weather.

As you are aware the request to AKC for membership status has been submitted to AKC. We are now in the review process. AKC has advised "We expect to report your club's request for member status to the August 2020 AKC Board meeting. We will be in touch shortly thereafter to advise of next steps."

Attached within you will find the 2020 National order form. Please submit your orders early. We are looking forward to celebrating with you at the 2020 National in Lebanon, TN. Will and I bought our plane tickets (too far for us to drive). We hope to see you all there!

I want to encourage the membership to continue to participate in the on-line pedigree database while we research much needed updates. It is available on the club's website. It is free to you as a member. Please share your pedigrees.

This is something I cannot stress this enough... This is your club and we need to hear from you! Please reach out to the current board if you have questions, concerns or ideas that can help improve the club for the membership.

Please stay informed by reading the board minutes each month. It is the best way to find out what is happening with the club and plan to attend the General Membership Meeting held in conjunction with the National Specialty each year. Thank you for your time.

Respectfully Submitted,

Susan Souza  
President PPPA

Dear Members –

Your time is a precious gift to us!

The PPPA Board is requesting your assistance with several volunteer committee positions. It is important to note that experience is NOT necessary. We would be happy to mentor you!

The list of committees are as follows:

- **Judges Education:** Mentors and Presenters Needed... please see guidelines outlined in the standing rules posted on the members only page of the website. Reports to committee chairs: Jean Evanoff and Nola Boyd.
- **Media Committee:** Chairperson and PIP editor and on-going contributors to the PIP quarterly newsletter. This committee also submits articles to breed magazines on behalf of the club and maintains the FB pages and website. Committee chair reports to the board. Interim committee chair: Susan Souza
- **Top Twenty:** 3-4 persons needed annually at the shows. The next event is only 5 months away and we need help with fund raising, collect raffle items (separate then the National), assist the night of the event with counting score sheets, ring stewarding, and music prep for each exhibitor, etc. Reports to committee chair: Susan Souza.

If you would like to volunteer, please contact the committee chair directly or the PPPA Board. We look forward to hearing from you.

Together we can take this club to the next level!

## BREEDING PRACTICES

Written by Jean A. Evanoff

Our dogs have a total of 78 chromosomes, with 20,000 genes, resulting in millions of combinations of genes, when bred. Of those chromosomes, 76 are autosomes and 2 are sex chromosomes. All of the genes pass on the genetic information from parent to pup. These genes can be dominant or recessive. Most harmful traits tend to be recessive. For the trait to show up in offspring, that puppy must get a recessive copy of that gene from the sire and a recessive copy from the dam. In the case of a dominant trait, the pup can get a dominant gene from the sire and from the dam, or a dominant gene from just one parent.

When breeding, it is good to know what type of breeding you are doing, based on pedigree.

**Outcross:** This is a way for a breeder to introduce new traits into a breeding program. There are no common ancestors in 5-6 generations.

**Linebreeding:** Here, you can concentrate desirable characteristics. There are one or more common ancestors in the last 5-6 generations. You must look at health, temperament, type, and fertility to determine if you want to continue with a linebreeding.

**Inbreeding:** This breeding sets type. You can get the best of the pedigree or the worst of the pedigree, or a combination of those. Specifically, inbreeding is a father x daughter, mother x son, or a brother x sister breeding.

In breeding you must be aware of the positive and negative, genetic issues. As always, as a breeder, you are responsible for the puppies you bring into this world. Puppies that have more negatives than positives must be culled from a breeding program, by being placed into pet homes.

**Back breeding:** When you do an *inbreeding* and you have an excellent example of the breed produced, with great temperament, health, and type, you take that offspring and breed it back to one of the parents. You can keep this up, until you have set type. This is what a back breeding would look like:

$$\begin{array}{ccccccc}
 A \times B = C & & A \times C = D & & A \times D = E & & \\
 \text{or} & & A \times B = H & & H \times B = J & & J \times B = K
 \end{array}$$

Many "great" dogs of the past have been produced using back breeding. They were also dogs that could set breed type in their offspring.

How do you make the decision to breed using outcrosses or related dogs? Take stock of the dogs you are interested in breeding. Look at the parts of the dogs and rate each part (red, green, yellow) and see if there is compatibility between the dogs. You probably do not want to breed red traits to red or red to yellow, but it will help you determine if your breeding choices will work with your program.

## Recipes for You and Your Pets

For you...

### Spanish Rice

Ingredients:

1 lb. Ground Beef (may substitute ground turkey or chicken if desired)  
4 – 14 ½ oz. cans diced tomatoes with green chiles  
2 – 14 ½ oz. cans water  
2 – 6 oz. cans tomato paste  
1 can black beans drained  
1 can pinto beans drained  
1 cup chopped onions  
1 cup chopped bell pepper  
1 medium jalapeno pepper cleaned and finely chopped  
2 ½ cups white rice

Brown meat and drained fat.

In a large pot, combine all ingredients including the browned meat. Bring to boil. Lower heat, cover and simmer for 30-45 minutes or until the rice is cooked. Stir occasionally after first 15 minutes of cooking time.

Great addition to Taco Night, for large families and potluck meals.

For Your Dog's...

### Meatballs

Ingredients:

2 lbs. raw hamburger (the cheaper and fattier the better)  
3 eggs  
1 cup wheat germ  
½ cup vegetable oil  
2 cups quick cooking oatmeal  
¾ cup molasses

Mix all ingredients together in a big bowl. Make into meatballs (whatever size you prefer). Please the meatballs on a cookie sheet and freeze. Transfer frozen meatballs in a plastic freeze bag or container and store in the freezer. Thaw individual meatballs as needed. Keep a bag in the freezer for picky eaters or for whelping mothers, weaning puppies and dogs that have lost their appetite for any reason.

**Bon appétit!**

## ATTENTION BREEDERS!

### HAVE YOU BRED A BITCH <sup>\*</sup>IN THE LAST MONTH?

Go to the PPPA Website "Members" Area and Click on "FUTURITY/MATURITY" Then Click on "BITCH NOMINATION"

### HAS YOUR BITCH WHELPED IN THE LAST MONTH?

Go to the PPPA Website "Members" Area and Click on "FUTURITY/MATURITY" Then Click on "WHELP NOTIFICATION"

### ARE YOUR ELIGIBLE PUPPIES NOT FOUR MONTHS OLD YET?

Go to the PPPA Website "Members" Area and Click on "FUTURITY/MATURITY" Then Click on "PUPPY NOMINATION"
