Bible

The Gospel Project for Kids Bible resource is used to show how Jesus fits into the Gospel story from precreation to eternity, from Genesis to Revelation. Kinder Readiness and Kindergarten will chronologically study the big picture of 40 key events and discover their relevance. Over the course of the elementary years beginning in 1st grade, students will then expand on that knowledge and follow a chronological timeline of 146 key events that present the story of the fall to the return of Jesus. They will see how He is represented in the Old Testament and manifested in the New Testament. Throughout the journey, students also learn how they fit into His big picture. The students listen to stories/events that come to life as they use their iPads to scan QR codes and icons in order to experience them through a visual perspective. Afterwards they engage in hands-on activities pertaining to each event and journal about the Christ connections they made. The students may then take their journals home and become a living devotional as they share the events and their significance with their parents.

Bible is further coupled with historical events in 2nd – 3rd grades through the Veritas History Curriculum.
