

Dear Mare Owner,

We understand choosing the right stallion for your mare is a tough decision. Thank you for choosing to breed your mare with frozen semen stored and distributed by Carmyle Veterinary Services Pty Ltd. We hope to make this process as smooth as possible. Here are the guidelines and procedures for the distribution of this semen:

1. After you have finalized agreements with the stallion owner or semen agent, he/she will contact us and let us know how many breeding doses are to be shipped. We will only ship what is authorized by these agents.
2. If you, the client, are responsible for the shipping charges, they are listed here (for up to 20 doses):
 - a. \$88 (inc GST) Dry shipper hire: Includes liquid nitrogen and packaging
 - b. TNT or Toll Priority delivery to destination, and return delivery of dry shipper back to Carmyle Veterinary Services (return shipping label provided). Shipping quotations can be provided upon receipt of delivery address.
 - c. If the tank is not returned within 10 days, you will be charged a \$10/day late fee. Please be in contact with your veterinary clinic regarding this common policy.
3. Please remember that frozen semen shipments can arrive well ahead of the insemination date of the mare. Please give us ample time to prepare your shipment with care, at least 48 hours before the semen must be shipped. The frozen semen request form is on the next page; please print the form and fill out, then scan and email back to us. Or, you can type into the form and email it directly back.
4. Thawing instructions will be included with the semen shipment as well as a dispatch form detailing the shipment.

Thank you for your time and please contact us with any questions.

Sincerely,

Carmyle Veterinary Services Staff
