Loch Haven Hills HOA
PO Box 2137
Hayden, ID 83835

Attn: Jim Lemm, President,

A site evaluation was performed in and around the Loch Haven Hills HOA property to inspect the work that was performed to mitigate hazardous fuels that had built up in the areas adjacent to the private properties.

The Northern Lakes Fire District would like to commend you on your efforts to “Thin the Threat” following the Fire Wise tools to help reduce the risk potential or a major conflagration occurring near the homes within Loch Haven Hills. This type of mitigation can help the Fire District in the quick extinguishment of grass/brush fires greatly increasing the success of fire control and decreasing the chances of damaging the surrounding properties.

We recommend continued maintenance of the properties where the hazardous fuels mitigation occurred and that the owners of the private lots do the same to decrease the risk on their own properties.

Please do not hesitate to call if you have any questions.

Thank you,

Tyler Drechsel
