

Fall Update in Cardiology

The New Cardiology Paradigms: **FROM SIMPLE TO COMPLEX**

Overview

The Fall Update in Cardiology is an ongoing program of the Oklahoma Heart Research and Education Foundation. The program addresses common clinical issues facing healthcare providers who provide care for cardiac patients. This year's symposium focuses on both the basics as well as the newer therapies that are now available for patients.

Our goal is quality cardiovascular continuing education for medical professionals, including Advance Practice Providers, Nurses, Medical Technologists, other Ancillary Medical Providers, and students in those fields.
