

Program for the KHPA Spring 2021 Meeting

KHPA
Spring
2021

Saturday, March 6, 21

8:30-8:40	Announcements: Becky Tipton, President
8:40-9:40	Dr. Samuel Ramsey- Drivers of Honey Bee Colony Losses: What the Data Actually Say For every complex problem there is an answer that is clear, simple, and wrong (H. L. Mencken). This sentiment is clearly evinced in the complex issue of heightened honey bee colony losses. While the data do not present a singular culprit, they do show how the interconnected web of natural and man-made stress factors have negatively impacted honey bee populations. These data further imply that there are actions we can undertake to help the bees. <i>This presentation will not be recorded.</i>
9:40-9:50	10- minute break
9:50-10:50	Dr. Clarence Collison Applying The Basics Of Honey Bee Biology
10:50-11:00	10- minute break
