

Teen Program (TP)

There will be teen services to encourage the youth and open the door to allow teen fellowship. This will include educational projects, movie days and game days. The teens will be able to enjoy themselves in a safe environment. A time will be set aside at the community center for all teens to have “Talk-About-Sessions”. These sessions will allow the teens to have a platform to express their selves, talk about peer pressures and receive opportunities for mentoring. With all the peer pressures that the teens experience and the access that teens have to all the good and bad information on the internet; it is critical to have safe venues to distress from negative external stress factors.

Therefore, a time will be set aside where the teens can “Talk-About-It” and ask questions to their mentors and receive answers. Ministerial staff and a Health & Human Service Professional will be available to answer questions or concerns.

Check the **Calendar** page for TP days scheduled.
