

# Natural Gas Processing

*Process Solutions offers extensive experience in providing solutions for natural gas processing plants.*

*We understand that reliability and longevity of operation are of paramount importance*

**Effective, Long Lasting Filtration** is *critical* in every system in your gas processing facility. Process Solutions provides thousands of filter elements to their natural gas processing clients every year. Consider these success stories:

- **Coalescing and Particulate gas filters**
- **Instrument Air/Gas Filtration Process**
- **Liquid Filtration**
- **Strainers – basket, witches hat, etc**
- **Water Filtration Cooling Tower Filtration**
- **Sand Filters and Multi-Media Filters**
- **Activated Carbon Adsorption**
- **Liquid/Liquid Separation**
- **Piping specialties: Vents, Drains, Valves, Checks Sight Flow Indicators, Pressure control, and more...**

**Steam Control Products** are an important part of our offering. Whether you need simple steam traps, high pressure level gauges, condensate removal or condensate recovery, Process Solutions will assist you in selecting and procuring the most suitable and reliable products in the industry.

- **Steam Control: Traps, Condensate Management, Sampling**
- **Check valves and Control Valves**
- **High Pressure Level Gauges**
- **Tubular Sight Glasses**
- **Condensate Level Indication and Control**

**Reliable, accurate level control is a must.** If your liquid level readings aren't accurate, you can experience some very unpleasant consequences, from unnecessary shutdowns, special call-outs, and revenue loss to catastrophic failures. Here are some of the ways we can help:

- **Filter Vessel Level Control and Dump Systems**
- **Slug Catcher Level Control and Dump systems**
