

Mark off a square 18.5 ft x 18.5 ft.

1/128th of an acre

18.5 ft

18.5 ft

Walk and spray uniform speed

Time how long it takes to completely spray the square.

Fill backpack back up and spray into a bucket for the same amount of time as it took to spray the square from above. **Measure and record the number of ounce collected.**

The number of ounces you collect is equal to gallons per acre. Example 100 oz = 100 gallons/acre.
