

COVID-19 UPDATE

September 2020

Inner City School operated as an Emergency Childcare Center and continued to provide quality care and education to our students both in-person and remotely during the end of 2019-2020 school year. In addition, ICS was able to provide quality childcare for our families and our community for 10 weeks during the summer months.

ICS is providing *only* in-person learning for the 2020-2021 school year. After providing a mixture of remote and in-person learning at the end of the last school year, it proved to be overwhelming for our already stretched and overworked faculty. In addition, it was difficult for parents working from home to also stay on top of their student's classwork.

ICS is following the recommendations from CDPHE as well as early childhood licensing with mask wearing, social distancing (when possible), cleaning, and daily temperature checks. So far, the school has been free from sickness, and we are thankful for that.

We are excited for the new school year and continue to pray God's protection around our families and staff.
