

# Why NRC?

- *NRC has been in business since 1989. That's over a 20 year track record!*
- *NRC has extensive knowledge of timber markets helping us get the most money for your timber.*
- *NRC listens – we listen to your objectives and needs and devise harvesting plans that fulfill them.*
- *NRC understands that both the timber and the land have value & it is not in your best interest to profit from the timber while destroying the land. Knowing the **what, how, & when** are crucial in fulfilling your objectives without diminishing the long term productivity of your land.*
- *NRC knows how to market your timber. When markets are tight, knowing how to market your timber and the timing of the sale is especially important.*
- *NRC ensures all work is performed by experienced Registered Foresters not technicians.*

# NRC — Focused on Results & Personal Service

A well managed pine plantation

## Why a Consultant ? What's in it for You?

- Someone knowledgeable about local timber markets and market conditions to get **you** the best dollar at the best time.
- Someone to protect **your** interest and your land.
- Someone who knows **your** interest and objectives and not someone who needs to deliver wood to a mill.
- Someone that can give **you** a value for your timber before the sale.
- Someone who can tell **you** if you have received a good price for your timber based on current market conditions.
- Someone who will assist **you** with planning and provide assistance on what needs to be done after the sale.

## Here is what some of our long time clients have to say:

 "I like doing most things myself, but the one thing that I've learned over my 60 plus years of being a timberland owner is that if I want to receive top dollar for my timber, I use NRC. It makes all the difference."

*Joe Collins*

 "We have used NRC for almost 20 years. In 2009 they called and told us they could get an unbelievable price for our pine plantation. It was a once in a life time opportunity. So we followed their advice and couldn't believe the results – A 33% return on our initial investment. We certainly couldn't have gotten that kind of return from the stock market." *Bob & Betty Hayes*

 "Sure, we are like everyone else in that we want top dollar for our standing timber, but we don't want our land destroyed in the process. We have been using NRC since the mid 90's and have never been disappointed. We drive around and see other harvesting operations and don't know what we would do if our place ever looked like that. Thankfully, because of NRC's attention to details and knowledge and experience we have never had to live with that nuclear bomb has hit look." *John & Elaine Hankins*

"NRC had prepared a forest management plan for our 400+ acres of timberland. Two years later they called and said the market is right for the type of timber you have. So we went with their recommendation to sell some of our timber. I was astonished at the difference between the high and low bid, and couldn't believe how much money we received for the timber. Now it has all been replanted and growing more money to help serve the medical interests of our community. I guess money does grow on trees!"

*Lee Greer,  
Chief Financial Officer,  
Community Hospital,  
Tallasse, Alabama.*
