

# ECLIPSE OF THE DRAGON

## THE PROBABLE ASTRONOMICAL PROPERTIES OF THE BLOOD ATONEMENT

What is telling according to the Gospel accounts is that a great earthquake accompanied this darkness over the entire land. It has been proven scientifically that at times, the planetary alignment of various bodies does affect the gravitational force-field of Earth and in turn triggers earthquakes as pressure from the tectonic plates shifts as the core is also affected, etc. This study does agree with the work of Gil Broussard in that his models strongly suggest that a heavenly body 7 times the size of *Jupiter* eclipsed the Sun during the crucifixion of Jesus, Planet X. Given the scenario that indeed the 3-hour darkness was attributed to the solar eclipse of the Sun by *Nemesis*, then the following can be conjectured based on the angle and alignment of the planets. For one, if the Earth was seen from a bird's eye view of the Solar System as being the vertical axis in alignment with the Sun, then this means that the *Nemesis* heavenly body was in-between the Sun and the Earth. This would have and could only have produced the 3-hour solar eclipse.

On Earth below, Jupiter corresponded to the one crucified between 2 males. As above, the Jupiter was juxtaposed between 2 male constellation in the heavens, that of *Orion* and *Auriga*. If the conjecture of the research from Broussard is valid, then the phenomenon of Planet X, the Red Dragon, *Nemesis*, etc., does exist.

Will such a time approach the reappearance of *Nemesis* and be the variable that will likewise cause the darkness of the coming Kingdom of the Antichrist due the 5th Bowl judgment? Also, this means that *Nemesis* would have been somewhere in the planetary orbital planes of Venus and Mercury. Based on current speculation and from mathematical models it is believed that Planet X, that is the Red Dragon is coming from the south in a clockwise direction.

It would also corroborate the many ancient recorded accounts of such a celestial body approaching Earth that coincide with worldwide catastrophes of varying degrees. The degree to which the severity of the flybys affected Earth was determined on the angle, the place the mini-solar system intersected the planetary planes and on which side of the Sun the Earth was on. What is also interesting is that based on this angle, the planet Jupiter is approximately 33 degrees from the Earth-Sun alignment.
