Duplicitous - by Peter Green

Guess the words defined by the clues. The answers vary in length from 3 to 8 letters long and of these 8 are capitalized, 1 is a prefix, 1 is a variant spelling and 2 others are uncommonly used nouns. Enter the answers in the grid one after the other starting in the top left corner and in the same order as the clues. Across words that don't end at the rightmost square of the row will continue on the leftmost square of the next row. Similarly, down words that do not end in the bottom square will continue at the top of the next column.

4 across words are duplicates of 4 other across words so no clues are provided for these and it is the solvers' responsibility to determining where they fit. In addition, for 4 other across words and 4 down words, one letter will need to be removed from each answer before it is entered into the grid. These 8 letters, taken in order (across and then down) will provide an appropriate phrase for this puzzle.
