**JDP to Present at Canada – U.S. Partners in Biomedical Defense Conference  
(Washington DC)**

**LANSDALE, PENNSYLVANIA, USA, February 09, 2010** - JDP Therapeutics, Inc, a specialty pharmaceutical company, has been invited as a featured company to present at the “Canada – U.S. Partners in Biomedical Defense II” Conference, in Washington, DC, on February 10, 2010. The conference features leading bio-defense companies from Canada & the United States involving biomedical research and development of vaccines and therapeutics. Attendees include representatives from key government agencies and the private sector. JDP will highlight its lead development compound JDP-205 for potential use in battlefield and hospital applications.

JDP Therapeutics Inc., founded in 2008, is a specialty pharmaceutical company focused on developing small molecule therapeutics to treat life threatening diseases with significant unmet medical needs, primarily for use of acute care in the hospital setting.
