Meat Processing, Packing & Distribution Project

The Meat Packing Plant will process a mixed quantity of Cattle and Goats to be sourced from the local headers and suppliers in related Country neighboring Countries. The Project's main products line will include Processed Beef Cuts as primal and sub wraps, providing different cuts of the meats like steaks, middle meats, etc. Other meat products to be produced will include Goat Meat Cuts, Bacon, Sausage Products, Tenderized and Smoked Meat Parts, etc.

The meat products will be packed in pre-printed vacuum-sealed packages and stored in the Plant's Cold Storage and Refrigeration Systems and distributed to local Supermarkets and Restaurants, initially utilizing 2 x 3-ton Refrigerated Delivery Trucks.

Estimated Cost including Equipment , Installation, Training & Start-up -, from \$979,000.
Cost of Medium Scale Meat Packing Plant , from \$5.3 million.
