

North Olmstead, Ohio

PROJECT

Dover Center Road Resurfacing

LOCATION

North Olmstead, Ohio

PRODUCT

GlasPave 25

QUANTITY

30,000 square yards

OWNER

City of North Olmstead

CONTRACTOR

Burton Scot Contractors

ENGINEER

Richard L. Bowen & Associates

INSTALLATION DATE

July 2009

PROJECT DETAILS

The asphalt pavement on Dover Center Road had reached the end of its service life based on a low PCR and highly cracked surface. The local engineer was charged with creating a resurfacing design that would last longer despite prospect of a high level of reflective cracking which shortens pavement service life significantly.

Tensar performed an analysis of the pavement and executed a preliminary design showing the advantages of a reinforced, waterproofed pavement overlay.
