

**Arlington Heights
Animal Hospital**

ACUPUNCTURE SERVICES are now available here at Arlington Heights Animal Hospital.

Dr. Bindu Mohan (Soman) is a trained veterinarian and certified veterinary acupuncturist who will now be providing acupuncture services to our patients. Dr. Mohan is not new to us and as many of you know has been practicing veterinary medicine with us for many years.

Acupuncture increases circulation, causes a release of endorphins (the natural pain-killing hormones), relieves muscle spasms, stimulates nerves and stimulates the body's defense system. It is beneficial for treating multiple conditions such as arthritis, allergic dermatitis and diarrhea.

All appointments are made directly with Dr. Mohan. Please call her at 847-477-9461 or email her at bindu.mohan@usa.net. She will set up a time to meet you here at our facility.

Veterinary Acupuncture Services

- * Acupuncture
- * Herbal Medicine
- * Food Therapy
