

Drug & Alcohol Testing For A Safe, Productive Workplace

Recover Appalachia makes drug testing employees easy.

- We will send a technician to drug test your employees there on your company site or we can do your testing in our office.
- We will save you time and money by coming directly to your company anything, 1st, 2nd or 3rd shift.
- We offer you afterhours and weekends testing.

We provide the following services:

- Traditional, laboratory-based urine and oral fluid testing
- Point of collection urine testing through on-site, instant results.
- Custom Panel Design : to meet your companies specific needs
- Pre-Employment/Random Testing

We can maintain you employee list and random testing needs to promote a fair and unbiased process.

- DOT Compliant Drug Testing

- Medical Review Officer (MRO) Review
- Hair follicle and Nail Testing
- After hours and weekend testing

Toxicology

To ensure your programs effectiveness, our lab's procedures meet and exceed the certification requirements of all federal and state regulatory bodies, including those of the industry's benchmark, the Substance Abuse and Mental Health Services Administration (SAMHSA)

All specimens are subject to state-of-the art dual testing that will stand up to legal challenges. Screening is performed through immunoassay, and all non-negative test results are confirmed by Gas Chromatography/Mass Spectrometry (GC/MS). Scientist and the courts recognize this testing methodology as being the definitive method to verify a positive test result. Our lab can also use LC/MS/MS (liquid chromatography/mass spectrometry/mass spectrometry) as a method to confirm presumptive positives from screening.

Become a Community Partner in Action: Recover Appalachia is a non-profit recovery support program & drug testing facility. When individuals are passing drug test, attending classes, support group meeting and working hard to be an Overcomer, we believe they deserve a job. We are looking for Community Partners willing to place these individuals in meaningful positions as we continue to monitor their progress. Please join us and be a Community Partner in Action.
