

# Community Town Hall Conversation on Alzheimer's Disease

More than 23,000 Rhode Islanders are living with Alzheimer's disease. With the aging of our population this number is expected to climb in the next few years. In response, 5 years ago Rhode Island developed its first state Alzheimer plan, now being updated—and we need to hear from the community.

**Anyone with an interest is welcome—persons living with dementia, family and professional caregivers, health and long term care workers, curious citizens, students.**
