Hi Jennifer,

As you requested, these are the screens from the 2009 case I told you about. This first set (6 pages) is a printout from one of [REDACTED] "follow-ups". She did all but the top one, 2/17/12, that has FM which is her friend [REDACTED] (now gone). I'm sending his next (3 pages). This case was initially abstracted by [REDACTED] (I believe that is her code) and I do not know why at least the second primary wasn't picked up at that time and more information entered on the one she did do. I cannot get into Metric right now (it is down here and at UMMG) but as I told you I had these printouts in my office from a few days ago. I believe this was diagnosed here and should have had a lot more information available for the abstract.
