- Mentor - Hong Kong University of Science and Technology

Quotes:

“Teaching and mentoring him is exceptionally rewarding because he makes the most of every opportunity to grow as a scholar. He is highly focused and self-motivated in his work (he credits his family’s military background; I credit his passion for learning). He is moreover highly responsive to feedback. He consistently builds on the comments I give him to strengthen his analytical and communication skills, and I have never had to point out an area for improvement twice. Along with his work ethic and dedication, his genuine enthusiasm for learning make working with him a real pleasure.”

Ian Nawrocki - Assistant Professor of Arts and Humanities

“This award will allow me to continue my studies, and give me the financial liberty to continue pursuing projects which will help me become a better web developer, as well as a better global citizen. I can only express my deepest thanks for this great opportunity.”
