

PSAT/SAT DATA ANALYSIS WORKSHOP

Chris Heintz from College Board will demonstrate the functionality of the College Board Assessment Reporting Portal and the new features in official SAT Practice on Khan Academy. He will also share how to read and interpret student's data from standardized tests and then how teachers can utilize the information to help their students achieve higher scores. It is important to bring your own device and to have access to your school's data on College Board. We encourage a school team to attend.

WEDNESDAY, FEBRUARY 21
