

# Fertilizer and Compost Performance Enhanced With C20™

## Case Study #8:

*“Feed the soil microbes that feed your plants”*

**Vegetable foliage density and color** is significantly improved on the vegetable plants where the soil has been treated with C20™. The entire vegetable garden was treated with compost and organic fertilizer. C20™ was then applied to the left half of the garden and mixed into the top 4” of soil in the late spring of 2015. The right side was not treated with C20™.

These photos were taken in mid summer. The yield was greater and lasted longer on the plants treated with C20™.

Minneapolis, Minnesota

***C20™ is ideal for treating trees, shrubs, and flowering plants  
in yards, gardens and landscapes.***
