## Installing Photo Sync on PC

# Copy from Phone/tablet to ....

- <https://photosync-app.com/>
- **Download**
- **Check for virus**
- **Install**

# Installation

- **After the download**
- **Navigate to “downloads” folder**
- **Find this new download file**  
**”photosync\_setup\_en\_306.exe”**
- **The number *306* will be higher as**  
**the program is updated over time**
- **To start the installation**  
**Double click**  
**”photosync\_setup\_en\_306.exe”**

# Installation

- **You will be prompted to allow Photosync to make changes to your computer's hard drive**
- **Click “allow”**
- **Once the installation is complete you will have an icon on your desktop**

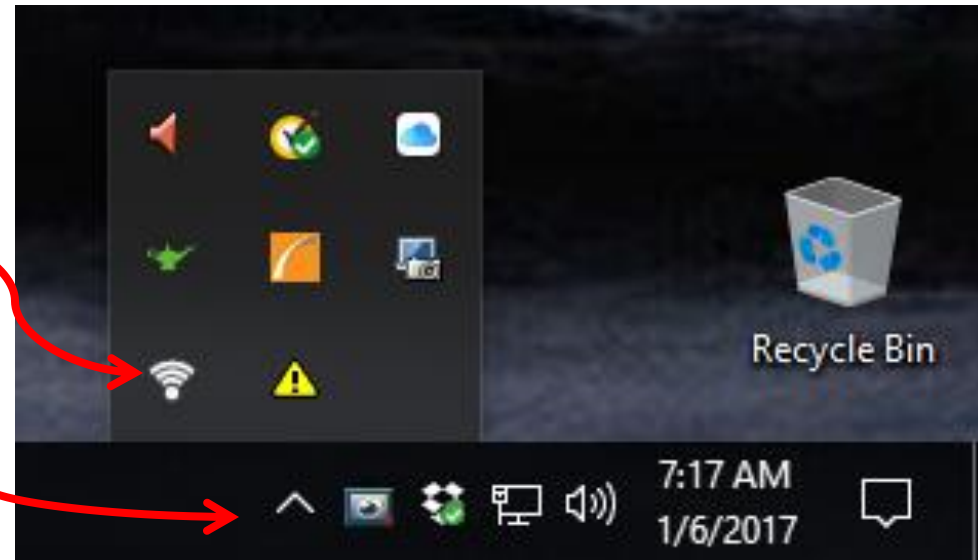

# Installation

- **Double click the Desktop Icon**

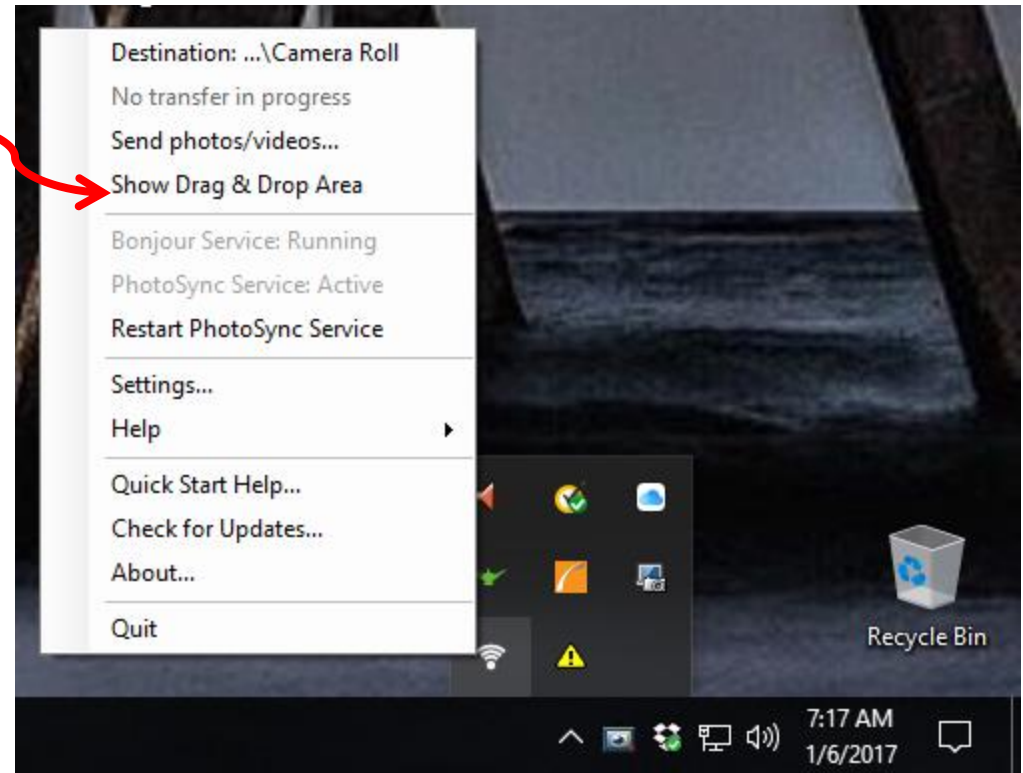

- **Now look at the bottom right of your desktop**
- **Look for the flashlight like icon by clicking the “caret”**

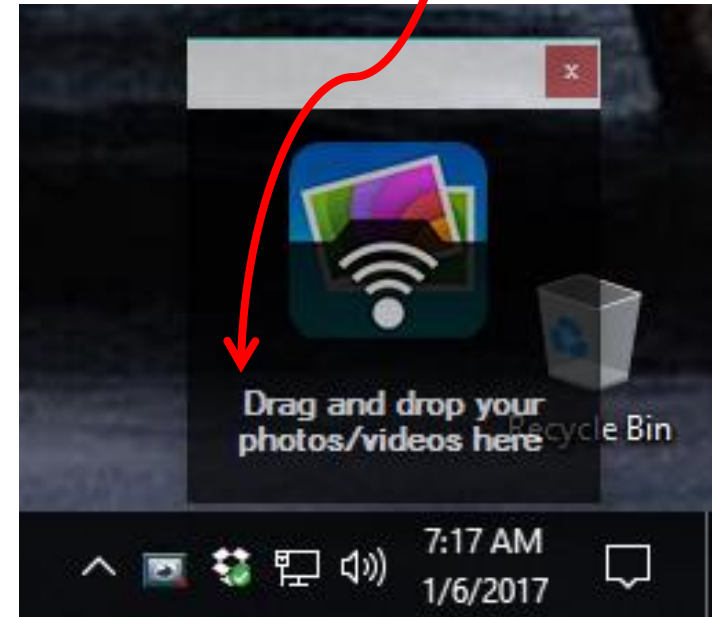

# Installation

- **Right click the flashlight**
- **Choose “Show Drag & Drop Area”**

# Installation

- **You will see a new box with the logo with the title “Drag & Drop your photos/videos here”**
- **NOW you are ready to do your Wi-Fi transfer FROM phone/tablet TO pc**

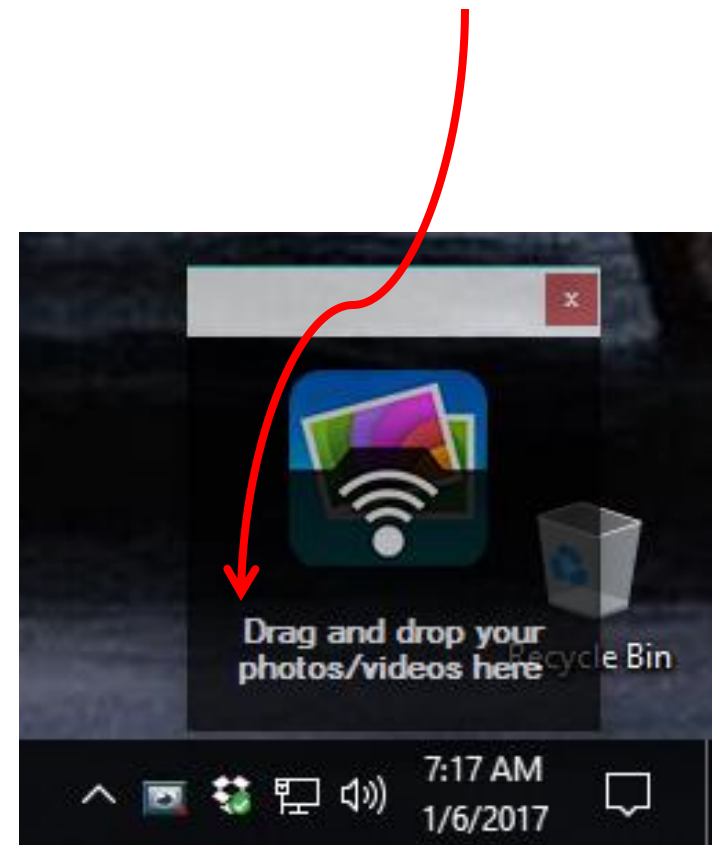

# Installation

- **When transfers are complete**
- **Click the red box to close the drag/drop area**

- 

- **Next time to start,**
- **Click on the caret**
- **Right click on the flashlight**
- **Choose**  
**“Show Drag & Drop Area”**
- **Start Wifi Transfers**
