

Aqua Pro Pump Systems
a Tomiko Inc. Company

GEBS SERIES 04/15

**SKID MOUNTED SIMPLEX
BOOSTER PUMP SELECTION CHART**

IMPORTANT: To calculate discharge pressure, always add the inlet pressure to the boost pressure shown on chart. Example; GEBS5040 provides 50 gpm @ 40lb * boost pressure, plus 30 psi provided to the pump inlet making your discharge performance is 50 gpm at 70 psi. This chart is for quick reference assistance, flow and head performance may vary +/- as much as 2%. Rated pump operating pressure is 125lb. Code does not allow more than 80lb in structure. Systems are factory set but field adjustable..
