

MOON-VENUS TRANSIT

The purpose of this study is to illustrate a rare Transit of Venus occulted by the Moon. The famous Transit of Venus in 2012 was across the Sun. This Transit of Venus is eclipsed by the Moon in the constellation of Virgo. One observation is that the main planets are in the vicinity of Virgo, in which the Transit occurs and next to Scorpio and Ophiuchus. What is noticeable about this event on December 7, 2015 is that it corresponds to the Holy Feast of Hanukkah. The actual start date is at sunset on December 6th but the actual Transit of Venus by the Moon approximately will last the whole day on the 7th. Another unique observation is that if one adds the ominous 666 numerical coefficient number to the Hanukkah date of the Moon-Venus Transit, the end date corresponds to the end of Sukkot on October 3, 2017. This date is also 13 after the other ominous 'sign' that many are attributing it to the Revelation 12 Great Sign in the Heavens that is the Virgin engaged in the celestial struggle between the Seed of the Woman and Lucifer the 'Shining Serpent'. The context of this Great Sign is that of a travail, a birthing, a war, a birth and a rapture. The imagery of the December 7, 2017 Moon-Venus Transit does have the iconographic symbols of what many in the End Times studies see as the elements that suggest the coming Rapture of the Bride by the Groom.

There is the 'coincidence' of the constellation Virgo where the Transit occurs. Another unique observation is a mathematical relationship amongst the 3 main planets associated with the Moon-Venus Transit. For on all these 3 planets are juxtaposed in Virgo also. The approximate spacing between Jupiter, Mars and the Moon-Venus Transit is in phi ratio. This is just another nuance of the synchronicity and marvel of YHWH's Creation using sacred geometry and clockwork. Thus the conjunction of the Bright and Morning Star, Jesus with the Bride, the Moon is just another foreshadowing of how the Cosmos has the pre-established signatures of the Creator and perhaps of the Rapture of the Bride by the Groom to come.

THE BRIDE
The Coming Rapture
A 'picture' of what is to come

Thus the conjunction of the Bright and Morning Star, Jesus with the Bride, the Moon is just another foreshadowing of how the Cosmos has the pre-established signatures of the Creator.

VENUS
occulted behind

THE GROOM
Bright and Morning Star

The Moon has always been considered the consort of the Sun, in terms of reflected glory that the Bride of Christ reflects off the Son of GOD. Then the planet Venus is alluded to Christ Jesus Himself as one of the divine titles Jesus gave Himself.

This study, in no means is an assertion that the Rapture is to occur on this date but that the Heavens are continuing to declare the Glory of the LORD YHWH and that His time-table is going according to plan.

End of Sukkot
