*Note- Team scores were determined by the following process:

I took the total team handicap and subtracted the number of pops used on the first 6 holes. I then took 67% of the remaining handicap to determine a final score.

Example: Quinn/Quinn had a combined 34 handicap. Had 13 total pops on first 6 holes to leave 21. Took 67% of 21 exactly to come up with final team score- 67 – 14.07 = 52.93
