

WM Security Solutions

We Help You Keep Peace!

WM Security Solutions offers a portable security headquarters (trailer), where the Security Officer can monitor the electronically-controlled alarm system. Now you can secure your commercial or residential construction site twenty-four hours a day, every day, with a customized security package designed to your exact specifications. WM Security Solutions is the security industry's leader in security of construction sites. Innovative, specialized technology and equipment enables WM Security Solutions officers to efficiently oversee large areas from a single command post.

WM Security Solutions offers On-site trailer packages with officer who patrols the grounds when your employees leave for the day. These officers observe and report any site disturbances by documenting them on daily reports. WM Security Solutions has taken an unprecedented stance in its trailer package by providing a superior level of accountability on jobsites by equipping all trailers with innovative, highly sensitive alarm panels. These specially engineered panels are linked wired or wirelessly to strategically-placed smart sensors around "hot zones" and other client-specified locations on the site. When an alarm is triggered, the officer is alerted by the Command Center and is dispatched to investigate the disturbance. By adding this extra level of security, the communication gap between the guard the client, and WM Security Solutions is closed. The combination of the physical deterrence of a security officer along with technological vigilance enables WM Security Solutions to provide an integrated solutions.

WM Security Solutions specializes in on-site construction security. We serve the construction industry including property owners, real estate developers, building contractors and trade subcontractors. Security on a project is managed by placing infrared sensors around the perimeter of the site, large warning signs as well as highly visible security trailer with Guard Patrolling around property.

While consistently expanding our services, WM Security Solutions continues to offer reliable, professional security officer in the industry. Our expansion Throughout California demonstrates our desire to continue providing high quality, effective and affordable security solutions.

When you hire WM Security Solutions to protect your construction site or abandon property, we provide complete care solution with trained security officer with the tools & support at much lower cost than our competitors.

We propose to provide & install fully qualified unarmed security guard with trailer setup to cover the jobsite from your designated hours.

The need for on-site security is especially important in and around construction sites regardless of the size of the job. Access control is a construction supervisor's main concern while the crew is not present.

WM Security Solutions offers you up to 24 hours, 7 days a week security coverage at a low cost per hour rate. Along with providing trained and uniformed security personnel, **WM Security Solutions** provides an assortment of full-service security programs.

- ✓ Our guards utilize visitor and vendor login sheets to record all access to the construction site.
- ✓ Access is denied without proper authority and no equipment or material is released without proper permission from the construction supervisor.
- ✓ Every construction site has valuable equipment's and materials, which tempt the experienced and amateur criminal alike. Trained security officers are the best and most professional work force to utilize in these cases.

We Offer The Following Services To Construction Sites:

- * Access Control (Login & Logout Visitors, Vendors And Equipment)
- * Patrol The Construction Site In Random Intervals
- * Prevent Graffiti
- * Protect From Unauthorized Visits
- * Evict Solicitors And Loiters
- * Control Homeless In And Around The Construction Site
- * Report Any Unusual Conditions To Construction Supervisor
- * Write Daily Activity Report

WM Security Solutions provides our clients the most excellent security service so they can focus time and energy on their business. Our primary goal is to ensure that your establishment is safeguarded.

During Off-Peak Hours:

- * The Security Guard will arrive at your facility prior to closing.
- * If a vehicle is required, the Security Guards vehicle will have a strobe light on the roof. In addition, a plaque will be displayed on both sides of the vehicle marked SECURITY.
- * The security specialist will roam (via vehicle or foot patrol) the area, where the trailers and equipment are parked looking for any suspicious activities.
- * The specialist will roam the area in random intervals at a minimum of three times an hour. If in fact there is any devious commotion, the guard will call 911 immediately, followed by your designee and then a supervisor from **WM Security Solutions**.
- * The security guard will keep a log on times he roamed the facility in addition to any relevant information. Any employee who enters the facility on off peak hours will be logged in and out. The employee will need to have their employee badge with them and provide a reason for entering the facility. If the employee does not have his/her ID badge, they will not be allowed to enter the facility without permission from your designee.

During Peak Hours: The Security Specialist will:

- * Ensure good communications with the Construction Supervisor and confirm communications frequently.
- * Ensure all paperwork is neat and orderly.
- * Meet with the Construction Supervisor daily to discuss any security issues.
- * Perform access control into the construction site.
- * Maintain a visitor log, vendor log and any other logs required by the Construction Supervisor.
- * Any other security responsibilities required by the Construction Supervisor.

***Trailer Guard:** We can provide a portable security headquarters (trailer) set up on construction site; we will supply and install a perimeter alarm system customized to the needs of your site. We will provide cell phones, warning signs, fire extinguishers, first aid kits, and such other tools and/or equipment required to monitor activity on your site. Our security officer will spend time to patrol and then to monitor the site as mentioned.

Once you choose **WM Security Solutions** as your security company, you will find a highly trained and motivated service staff, who will provide you with the highest quality security service on a consistent 24/7 basis! We do a great deal of work for construction sites and would be happy to provide you with references if desired.
