## OUR NEWSLETTER

Our goal is to be able to reach other topics or questions that arise with our customers. So if you have any questions or items you would like to share please email:

[JulieM@pavementtechnology.com](mailto:JulieM@pavementtechnology.com).

## Our Service and Technical Department is hard at work!

We are currently building several pieces of equipment with shipment dates coming soon. The techs have visited multiple sites to set up and calibrate equipment. If you would like to set up an appointment please contact our office.

## SPOTLIGHT QUESTION

**Q: If there is moisture in the air lines what should I do?**

**A:** Install dryer/separator on incoming air supply to prevent moisture from entering pneumatic system on testing equipment.

*"You've got to start with the customer experience and work back toward the technology, not the other way around."* **Steve Job**

## *Mobile Testing Laboratory*

*(Picture to the left – shell of mobile lab)*

The 50' x 10' Mobile Testing Laboratory Design can be used to test Asphalt mixes, Portland Concrete, quarry aggregates, and similar production processes. The lab consists of four rooms; dirty/noisy room, clean room, office and storage. These rooms have the capability to accommodate testing equipment needed for Conventional and Superpave Design and Testing.

**The 2016 Transportation Research Board 95th Annual Meeting** will be held January 10–14, 2016, at the Walter E. Washington Convention Center, in Washington, D.C. The information-packed program is expected to attract more than 12,000 transportation professionals from around the world. Over 200 Exhibitors and 12,000 Professionals will be there with more than 5,000 presentations about 750 sessions. Registration opened September 1, 2015.
