DESCRIPTION: The Kodiak Hunter is the big brother to the shorter Kodiak Magnum. This Kodiak Hunter is well weathered but still a great looking and performing recurve. Shedua riser. Bow has been partially refinished. Bow has no delamination; no cracks; limbs are straight. Overlays and tips are in good condition. 1 small filled screw hole on the back of the riser above the decorative overlay (see pic on p. 3). No chips, dings or cracks. A couple of superficial filled stress lines in the riser fade-outs—neither of which extend into the working area of the limb. No crazing. A few minor scratches and nicks here and there. Decals are in fair condition.

COMES WITH A NEW STRING.
