To Whom It May Concern:

Re: Balton Construction

The Architectural Studio has been asked to comment on the capabilities of Balton Construction, Inc. of Ephrata, PA, and we are pleased to do so.

Balton Construction was the low bidder on a new public restroom building designed by our firm for the Governor Mifflin School District in Shillington, PA. Balton's work on this project, which is now complete, was exemplary: schedules were adhered to, paperwork was submitted in a timely and satisfactory manner, change order requests were handled fairly, coordination with other contractors was directed by Balton in a highly efficient manner, etc.

Most importantly, the work itself was excellent: workmanship was of high quality, and the construction documents were followed in careful detail. Punch list items or construction issues were rectified quickly and efficiently.

Overall, as the design architect and project principal-in-charge, I can say that in my forty years of experience I have seldom worked on a project that went so smoothly, for which Balton Construction's very professional staff deserves much credit.

I highly recommend them to you.

Paul Felder, AIA
