Osyпка Medtec Inc.,

Secures Two Quality System ISO Certifications

*OEM Medical Device Contract Manufacturer's Dedication to Quality and Innovation is
Evidenced in Products, Services*

Longmont, CO— November 4, 2014 —Osyпка Medtec Inc., which specializes in contract manufacturing of implantable medical devices, has recently obtained ISO 13485: 2003 & ISO 9001: 2008 certifications. The US based medical device contract manufacturer uses an ISO 14644 1 Class 7 (USA Class 10,000) cleanroom to assemble sensitive Class 2 and 3 medical devices at its Longmont, Colorado facility.

The US based Osyпка Medtec and European Osyпка AG operations work closely together using a “one team” strategy designed to offer the best products to customers and partnerships worldwide. A critical component to their success includes an installed and validated state of the art Hermetic Glove Box Laser Welding System with a high vacuum bake-out oven, giving them the ability to hermitically seal medical devices and perform full-leak testing for hermetic medical devices.

“We are proud to offer innovative German and US engineering of the highest quality at our new US based facility. Osyпка Medtec gets direct support from our German headquarters and we look forward to the continuing growth at Osyпка Medtec” stated Dr. Nicola Osyпка, member of the Board of Directors for Osyпка Medtec and CEO of Osyпка AG.

Incorporated in 2013, Osypka Medtec Inc. is a wholly owned subsidiary of Osypka AG with a focus on serving the U.S. Medical Device Market with similar services.

Osypka AG, a world leader in high precision silicone injection molding, laser welding, and many other technologies, including development and distribution of innovative medical devices was founded in 1977 by Professor Peter Osypka and is located in Rheinfelden, Germany.
