Big business accounting tools for small business

Centralized financial accounting system to maximize business productivity and to manage cash flow, invoicing, budgeting, and inventory—at a price small businesses can afford.

Sage 50 Quantum Accounting provides small businesses with extensive accounting functionality comparable to much more complex and costly mid-market accounting systems—but at prices small businesses can afford. In addition, Sage 50 Quantum Accounting has been architecturally designed to grow with your business and built to support an unlimited number of customers, vendors, and inventory items.

Benefits

- **Time savings** with streamlined processes for advanced project and inventory management.

- **Increased staff productivity** with controlled access for up to 40 users.

- **Payroll processing**—the latest tax tables are included at no additional cost with a one-year subscription to Sage Business Care Gold.[1]

- **Convenient support**—enjoy peace of mind knowing a dedicated team of support specialists is ready to help.

Advanced Serialized Inventory

Reduce waste and rein in inventory carrying costs by tracking individual inventory serial numbers from purchase order to delivery.

Role-Based Security

Sage 50 Quantum Accounting gives you full control of user access. Role-based security controls allow for screen-level and report groups access control.

View Graphical Trend Forecasts of Key Business Data

The Trends Forecast dashboard illustrates your company's projected performance in a set of four graphs and provides trend forecasts of your business' key performance data or indicators (KPIs).
