

Pearl luster pigments use in color cosmetics is widely used to provide three-dimensional feeling and bright color. However, when used in base makeup products, they often look unnatural due to excess gloss and sparkle. By specially surface treating titanium dioxide with mica, using our unique technology which balances both micro-uniform coating and non-uniform coating, we have developed a mica composite pigment that can :

- Provide natural looking makeup
- Cover skin defects without excessive gloss
- Help correct skin color with interference effect: Gold, Red, Violet, Blue, Green

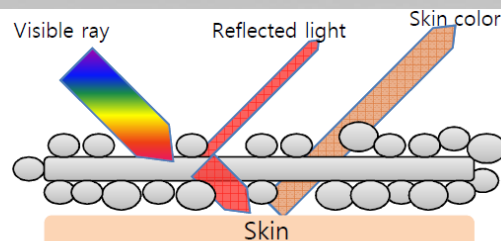

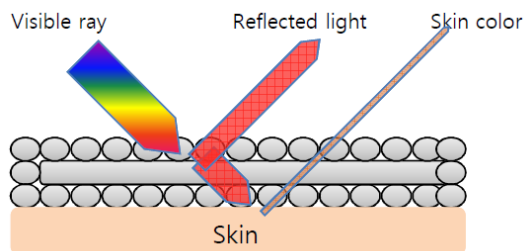

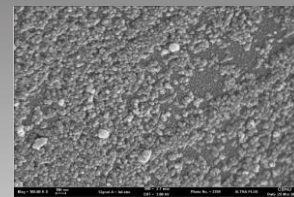

Normal Reflective Powder

Excessive gloss/shine and hiding effect
Distorted skin color

Bloom Powder

Soft luster and hiding effect
Natural skin color expression
Healthy looking

ARGAN Bloom Powders can be used in skin care and make up formulations to enhance a gentle, dewy, radiant appearance while provide a soft focus effect (translucent hiding effect). Their natural looking appearance and variety of available colors is ideal for a diverse range of skin types and complexions.

Bloom Gold Powder
