1995	Bachelor of Physiotherapy University of Queensland, Australia

RESEARCH

Interests

Strategic leadership; managerial discretion; executive characteristics and experiences; executive succession; corporate governance; social networks

Summary

My research interests lie in the field of strategic management, with an emphasis on senior executives and their effects on organizational outcomes. Most of my work examines managerial discretion, the extent to which top executives are able to influence their firms' strategic actions and eventual performance outcomes. I am also interested in the topics of CEO/executive succession and executive characteristics. My current work in this domain focuses on how CEOs' personal characteristics and experiences affect the nature of firm-level strategic decisions and behaviors.
