

Orthodontics

Many people that require special dental services turn to San Antonio orthodontics. Tran Dental is a full service orthodontic clinic that can provide highly specialized treatments that help correct dental malformations due to genetics or trauma. Orthodontic treatment is much more invasive than regular dental cleanings and a high level of expertise is required in order to ensure dramatic and satisfactory results.

Tran Dental can provide a number of services including correction of improper bites, jaw alignment correction, removal of crowded teeth, straightening crooked teeth, facial reconstruction, as well as fixing over or underbites. When most people think of orthodontics, they think of braces. The common metal braces of old have advanced and evolved into more comfortable versions that achieve results quicker and with less pain. Children should receive orthodontic consultations early in order to ensure they receive prompt treatment if necessary.

Contact Tran Dental for your San Antonio orthodontics services. Our clinic offers affordable payment plans, flexible financing, and highly trained staff in a comfortable and relaxing environment. We provide personalized care that is gentle and takes your specific needs into consideration. We accept most major insurance plans and children's Medicaid. Both of our two convenient San Antonio locations are CEREC available. Contact us today for more information or to schedule an appointment.
