

ADJUSTABLE GATES

Artex makes a variety of gates to meet most applications. All gates are adjustable and can be customized to include features such as man passes and wheels.

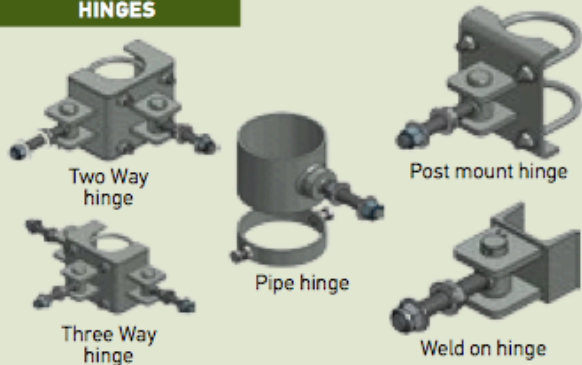

In other words, you can save yourself the cost of having custom gates made.

We provide choices for latching and hinging systems as well. Your barn, your way.

LATCHES

HINGES

Support Wheel

“We like the flexibility and simplicity of these gates. No cutting or clamping required. They are just easy to install.”
