Thank you for purchasing the AccuReader MagPick by LockTech. This set will allow you to open the magnetic shutter locks found on Suzuki, Honda, & Yamaha in seconds.

#### USING THE MAGPICK

- 1) Choose the correct pick for the particular model your working on. Verify it fits the magnetic door profile by the ignition.
- 2) Place the MagPick correctly on the face of the lock. Using only one of the four magnets, insert it into a hole on the MagPick.
- 3) At this point 1 of 3 things will happen
  - a) **The magnet will cling to the magnet in the lock.** If this is the case flip the magnet over, now it should push away from or oppose the magnet in the lock.
  - b) **The magnet will oppose and push away from the magnet in the lock.** If this is the case record the magnets orientation either silver or black for that hole.
  - c) **Or the magnet will neither cling nor push away from the lock.** If this is the case, no magnet is needed in this hole.

If the magnet clings to the lock flip it over. The magnet should now push away from the magnet in the lock. Note which end of the magnet is showing outside of the MagLock, silver or black.

Please take the time to familiarize yourself with the tools and verify all pieces are accounted for from the list of contents below:

#### TIPS& SUGGESTIONS

- 1) Only use one magnet when decoding the lock.
- 2) To open the lock, all magnets being used in the MagPick must oppose/push away from the magnets within the lock.
- 3) **Watch the demonstration video online at: [www.accureader.com](http://www.accureader.com)**
