

## **PRODUCT DATA SHEETS**

### **STRAIGHT FLUSH – DRAIN TREATMENT, LIFT STATION MAINTAINER AND ODOR ELIMINATOR**

#### **DESCRIPTION**

This product is an exclusive new formula distilled from organic plant and vegetable materials. It contains absolutely no petroleum distillates. It is designed to keep lift stations in sewage treatment systems clean, deodorized and free-flowing. The use of this product will keep the surface of the lift station free of accumulated grease. As the water level rises and lowers, it cleans the walls of the lift station as well as being an excellent deodorizer. If maintenance of the station is required, siphon off product into original container and after water is restored, transfer back into its normal floating position. Other types of lift station products that emulsify with water are lost when station is emptied for maintenance work.

**SAFETY AND HANDLING PRECAUTIONS:** Avoid breathing vapors or mist. Use with adequate ventilation. Do not take internally. Avoid contact with eyes and skin. Use safety glasses and non-porous rubber gloves when handling. Any material which contacts the skin or eyes should be washed off with plenty of water.

Handle as a combustible material. Vapors can ignite. Store away from heat and open flame. Avoid temperature extremes. Always store unused portion in original container with cap secure.

#### **FEATURES**

- **REUSABLE**
- **NATURAL CITRUS BASE**
- **ENVIRONMENTALLY SAFE**
- **DEGREASES & DEODORIZES**
- **NON-CAUSTIC OR NON-CORROSIVE**
- **DOES NOT EMULSIFY WITH WATER**
- **CONTAINS NO PETROLEUM DISTILLATES**
- **RETARDS ODORS**
- **ACTS AS A FLOATING ODOR CAP**

## **USE AND DIRECTIONS**

**Lift Station:** Maintain a 3'' layer on top of the water in a lift station.

**For Drains:**

- 1) Pour 1-2 gallons of water into drain
- 2) Pour **STRAIGHT FLUSH** into drain enough to create a 2-3'' layer

**STRAIGHT FLUSH** will immediately deodorize drains and create a chemical barrier to reduce evaporation and provide long-term odor control.
